National Cybersecurity Training and Education (NCyTE) Center

Advancing cybersecurity education in the U.S. by continuing to invest in technological innovation, resources, professional development, and tools to support community colleges and the workforce pipeline of tomorrow.

Expanding cybersecurity education through comprehensive cybersecurity program and faculty development activities.

- **543** — Member Institutions
- **163** — Faculty Professional Development Offerings
- **2,381** — New/Existing Faculty Trained
- **118** — Faculty-Industry Externship Applicants (25 Completed to-date)
- **342** — Faculty Fellowship Applicants (150 Started Program / 45 Graduated to-date)

95-100% OVERALL PARTICIPANT SATISFACTION

Across all NCyTE products and services.

Cybersecurity Across Disciplines Summit

Since 2023, the annual Cybersecurity Across Disciplines (CyAD) Summit is a unique event designed to serve both educators and industry in various fields to explore the intersection of cybersecurity needs within their specific educational program areas and industry sector/discipline. Is your sector/discipline covered?

"The best conference that I have attended in a decade."

-CyAD Participant

SAVE THE DATE
June 23-25, 2026

Developing and deploying leading-edge cybersecurity curriculum through a myriad of curriculum collections and resource channels.

- **16,115** — Clark NCyTE Collection Interaction
- **9,147** — CodeHS Enrollments
- **1,184** — Newsletter Subscribers
- **2,450** — YouTube Subscribers
- **1,348** — LinkedIn Followers
- **548** — Facebook Followers
- **99,622** — Video Views
- **208,536** — Website Engagement

Cultivating Industry Engagement and Career Opportunities in the U.S. and Internationally

International Cybersecurity Education Collaborative (ICEC)

The ICEC is based on a collaborative network established between UK and US cyber security educators, in partnership with the US Federally funded, National Cybersecurity Training and Education Center (NCyTE).

This exciting program aims to build further collaboration with like-minded countries. In support of this Collaborative, three special interest groups have been created.

- Diversity Special Interest Group
- Industry Special Interest Group
- Classroom Special Interest Group

- Placing STEM and Cyber Security Teachers into Industry
- The Role of International Collaboration in Cybersecurity Education
- Cyber Security Education Engagement in Australia
- NCyTE Team Visit to UK: A Cybersecurity Education Information Exchange

Dissemination Efforts to Improve Current and Future Directions of Cybersecurity Education in the United States

- The Impact of AI on the Current and Future Cybersecurity Workforce
- Bridging the IT/OT Cybersecurity Skills Gap: Building a Skilled Workforce Through Education, Industry, and Government Collaboration
- 2025 NCyTE Cybersecurity Alumni Workforce Study
- Cybersecurity Program Coding Report: Critical Steps to Assessing Education Workforce Outcomes
